

SENIOR CHEMIST, GIC

The ideal candidate for this position will serve as a technical leader for the systems formers division which will be demonstrated through identifying new system former technologies, training the sales team, and creating new and innovative sales tools. Under general guidance, the candidate will be responsible for creating unique cosmetic formulations that deliver on specific benefits and market-driven needs. The candidate must leverage knowledge of the scientific principles of formulation, and ingredient chemistry, and industry trends to support customer inquiries while utilizing critical thinking skills to provide insight into troubleshooting formulation and processing issues that may arise. The candidate must have the ability to independently conduct development work requiring a thorough knowledge of cosmetic formulation, application of advanced technical knowledge, and demonstrated successful stability. Candidate must have the ability to manage multiple projects with limited supervision.

Essential Job Functions

Technical Leader

- Responsible for new and existing system former evaluation.
- Responsible for updating system formers presentations and KISS sheets with updated technical findings.
- Routinely reviews and evaluate patent environment as it relates to Barnet ingredients.
- Responsible for developing training modules and lead technical presentations for lab days with the support of the Director of system formers and color innovation.
- Responsible for issuing processing guidelines to be communicated to customers.
- Assist in GIC lab training programs (ex. Webinars, customer meetings, new sales team hires) when required.
- Support marketing initiatives (ex. How to do videos).
- Aid GIC Lab Manager in system formers formulas creation to ensure reproducibility.
- Work in conjunction with the Director of system formers & color innovation to provide unique sales tools to showcase system formers (ex. Collections, kits, creative testing).
- Full proficiency in technical writing and communication, including oral presentations and deliver technical communications on project timelines.
- Skilled in summarizing work/key concepts for decision making.
- Skilled in business communication throughout the organization.
- Proactively, communicates project results effectively with peers and management, and begins to serve as an internal resource for staff.

Identify New Product Technologies & Innovation

- Responsible for leading the scale up initiative in terms of the program, implementing know-how, and communication to the customer.
